

Exposed: Power, Dynasties & Cover-ups

Who really holds power — documented history vs. weaponized myth

An evidence-first investigation of concentrated power: the dynasties and monopolies that shaped the modern world (Standard Oil, the Du Ponts, the Gilded Age trusts), the Federal Reserve's documented secret origins, contested and suppressed innovation (Nikola Tesla), and the famous fabrications — above all the antisemitic 'Protocols' forgery and the Rothschild myth — exposed for what the record actually shows. Documented history is never blurred with speculation, and conspiracy fabrications are dismantled, not amplified.

Focus areas: Monopoly, trusts, and the dynasties of the Gilded Age; Money and the documented birth of the Federal Reserve; Suppressed vs. contested innovation (Nikola Tesla); Anatomy of a forgery: the 'Protocols' hoax and the Rothschild myth; How real grievances get weaponized into scapegoating conspiracy

Following Power: Dynasties, Money & the Forgeries In Between

Documented concentration of power — and the fabrications that exploit it (Advanced · 65 min)

Traces real, documented power — Standard Oil, the Gilded Age trusts, the Du Pont arms dynasty, the Fed's secret founding — and then dismantles the famous fabrications (the Protocols forgery, the Rothschild myth) that hijack those real anxieties. The skill being built: scrutinize power on evidence; reject scapegoating conspiracy.

Documented Concentration [historical]

Standard Oil's 90% monopoly and 1911 breakup, the Gilded Age trusts, and the Du Pont 'Merchants of Death' hearings are settled history. Concentrated ownership of essentials = concentrated power.

Money's Secret Origins [historical]

The 1910 Jekyll Island meeting that drafted the Fed was genuinely secret — admitted by a participant. Take documented secrecy seriously without inflating it into an omnipotent cabal.

Contested Innovation [historical]

Tesla's papers were really seized; a suppressed 'free energy' device was not. Money, not a movie villain, decided which of his visions got built.

Anatomy of a Forgery [historical]

The 'Protocols' is a proven plagiarism of an 1864 satire, yet it fueled pogroms and the Holocaust. Exposing the fabrication — and refusing to scapegoat a people — is the real truth-first act.

For decades, cigarette makers hid what they knew about addiction and cancer — and a federal court formally ruled it racketeering.

CERN & the Large Hadron Collider: Real Science vs. the 'Portal' Myth [scholarly]

CERN gave us the World Wide Web and the Higgs boson. The 'it opens dimensional portals / will destroy Earth' claims are documented science fiction — here's the line.

Psychic Spies: The Proven 'Stargate' Program vs. the 'Looking Glass' Myth [historical]

The U.S. government really did spend ~20 years funding psychic 'remote viewing' (declassified) — but the viral 'Project Looking Glass' time-machine is unproven conspiracy. Know the difference.
